

TOWARDS HEALTH SPACE

ABSTRACT

We begin with a review. We outline an experiment and methodology. We present and examine our results. We describe our conclusions and dispel your delusions.

1. INTRODUCTION

Health is important, everybody knows that! But what is health space? It is the space in which health flourishes. As Shakespeare said:

A plague on both your houses! [3]

2. METHODOLOGY

Mainstream “news” sites publish many articles on health, most of them detrimental to the public consciousness. We would like to complain about this. COMPLAIN.

3. HEALTH PILLS

Many pills are available for the preservation of one’s health. These are wholeheartedly recommended by the authors without reservation [1]. Each generic pill increases your health points by 1 (one). Researchers and gamers often refer to health points, but how does one quantify this concept? We present a decomposition of the health point system and show that any health altering substance can be uniquely represented by a vector in health space.

Refer to Figure 1. Look at the colours.

The basis vectors of health space are orthogonal to fail, as death is orthogonal to health. Likewise, we note that the configuration space of health has many attractors, the Lagrangian conjugate being 4. Heading in an easterly direction across the country, the vector space increases exponentially with a chance of showers later.

I’ve had personal correspondence with a scientist who assures me that the Poisson distribution of the probable vectors (discounting non-Gaussian trout homomorphisms) gives an expected value of 4. The alert reader will note this agrees

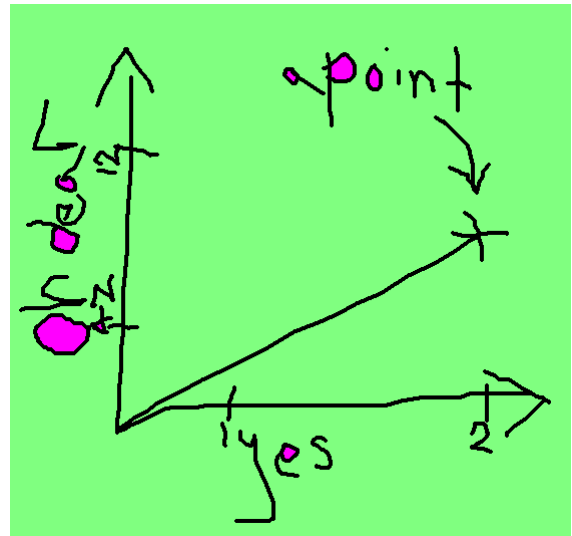

Fig. 1. A point in two-dimensional health space (note the non-linear scale)

nicely with the previous lemma relating to the previous conjecture.

O the curse of dimensionality! Condemned to wander vast planes of nothing, lonely as a cloud (of particulate matter). Woe to those news organisations who claim to understand the proliferation of factors, they are but blind men climbing an elephant doomed forever to rest in a local optimum. Hark! We seek to remove the blinkers of conventional and nuclear science! Behold yon mountain of ultimate health across the perilous chasm of sickness. In the next section we plot the path through this treacherous configuration space armed with nothing but the Principle of Least Action, and a slice of chocolate cake.

To the Science Laboratory!

4. CASE STUDY

An unnamed news source (BBC) claims that vitamins are bad for you. As this is contradictory to our knowledge of

health pills, we feel compelled to point out the flaws in their methodology. We enumerate them here for your edification:

1. It assumes people exercise. Extensive research in this area has shown that on average this is not the case.
2. It assumes you are literate.
3. It assumes you are alive.
4. It assumes $\mu > 5.3$ for all $\Gamma(x)$ which is patently not true!¹
5. There are many other flaws which space does not permit us to enumerate. We leave these as an exercise for the interested and credulous reader.

5. AVAILABILITY

The modern reader is fortunate that the joys of health pills are so readily and cheaply available. All one need do is sign up for an “e-mail” address on “Goo-gol” or one of a number of similar services, and receive frequent mailings of the latest advancements in pill technology. We have included for your edification a sample of such mailings received by the authors in appendix A.

Often the only action a reader need take is to “click” on a “link” embedded in the document and enter their credit card details, a quick and painless process that is sure to result in top quality pills.

The alert mail recipient will quickly become aware that a certain proportion of these offers relate to biological enhancements². The authors strongly discourage the use of these particular pills. There are many important factors to consider in the forking of a child, and implementations vary wildly in correctness. Seek professional advice.

6. RESULTS

	Value the First	Value 12	Error Code
Sample 1	4.2	12	7.4
Sample 5	11.8	12	u9
Sample 4	-5.1253	11.999	404
Sample 0	423432e-i	12	789.4
Sample i	∅	12	EIEIO

All measurements were taken in relation to the angle of the sun and peakiness of the experimenter on the day, and as such are accurate to the nearest uneven counting number. Relativistic effects were ignored. The horrific discrepancy in the value of 12 for Sample 4 can be attributed to the Frog Effect, detailed elsewhere [2]. Other than that, we feel these figures are self-explanatory.

¹We own the patent in question.

²Further detail would not be publishable in this family-oriented journal

Fig. 2. Exercising kills fish. FACT.

7. CONCLUSION

Death to mass media!

8. ENVIRONMENTAL CONCERNS

Previous work in the area of health has concluded that exercising releases large quantities of free radicals into the atmosphere, a menacing cloud that aggressively oxidises everything with which it comes into contact! [4] The ozone layer is peppered with holes above those urban areas with a high gym density (see Figure 2). What ever you do, don't exercise – you're causing global warming! Current best practice recommends the substitution of a good cup of tea as it is full of antioxidants and cow extracts³.

A. SAMPLE MAILINGS

A.1. Exhibit A

Subject: Weight loss without hunger? Dreams come true with Acai Berry!

If you have tried every possible diet and nothing worked on you, read this information. There is an easy way to lose your weight without dieting

³Cows are Good.

and starvation simply taking pills or capsules with herbal and organic ingredients which are 100% safe and effective. Your secret weapon against excessive pounds is Fatblaster. Powerful herbal formula of Fatblaster naturally assists the body in burning more calories.

A.2. Exhibit A1

Subject: Addicted to pills?

Do you spend your life buying pills from the internets? Are you lost in a sea of tablets? Like a ball pit, but with pills? A pill pit? Want some more? We have all the pills you haven't got! If you want them, please enter your details on the following website, and the pillules will be dispatched directly by bicycle courier.

<http://www.pillzrus532.za/es2331T>

A.3. Exhibit B

Subject: Reasonable prices on medications.

Canadian pharmacy is as good as American pharmacies but offers much lower prices on medications. High quality generic medications - easy to order and delivered in discreet packages! It's absolutely secure and safe! Visit us and calculate the money you save.

<http://bit.ly/zeX3T>

A.4. Exhibit C

A.5. Exhibit D

Subject: Softwares 4 u!

Looking for high quality softwares at low prices?
Want high-street brands at back-street prices?

Look no further than our pill store! Fill out the anonymous profile at the following website and we will recommend the perfect pills 4 u! Yay! If not completely satisfied return used pills for full refund!!! Alternatively, throw a brick through the window of your nearest police station for a full refund.
